

Dharmesh Vala

📍 Mumbai, Maharashtra ✉ dvala453@gmail.com ☎ 6354434661 📁 Portfolio in LinkedIn 🐙 Github

Summary

Software Engineer with 2+ years of experience building production AI systems and scalable web applications. Specialized in LLM integration (OpenAI, Claude, AWS Bedrock), RAG pipelines, and full-stack development using Angular, React, GoLang, Python, and AWS serverless architecture.

Experience

Software Engineer

Zeus Learning Private Limited

Mumbai, India

Jun 2024 – Present

- Architected and delivered an **AI-powered Resume Builder** leveraging Claude (AWS Bedrock) with RAG to generate or enhance ATS-compliant resumes, reducing manual creation effort by 70%, developed as a Single Page Application (SPA) using Angular with GoLang-based event driven microservices architecture.
- Built an **AI question generation pipeline** (AWS Bedrock + Dynamodb) producing questions with metadata from source material, replacing a 2-day manual authoring process with a 3-hour automated workflow using AWS EventBridge and Scheduler for orchestration.
- Streamlined question metadata generation by 60% by designing a RAG-based system (AWS Bedrock + OpenAI + Amazon Titan Embeddings) that automates tagging, taxonomy classification, and standardized metadata generation at scale.
- Improved question acceptance rate from 55% to 90% by implementing a **prompt evaluation harness** combining automated scoring metrics with structured human review feedback loops.
- Accel Learning** 📄: Released a new **microlearning platform** leveraging React Micro-Frontend architecture, integrated with AWS AppSync for real-time data handling, Python-based microservices, PostgreSQL, and serverless Lambda for scalable and efficient backend operations.
- Accelerated content authoring by 60% and optimized system performance by 40% by redesigning CMS workflows and optimizing backend services.

Software Engineer Intern

Zeus Learning Private Limited

Remote

Jan 2024 – May 2024

- Implemented **WCAG 2.1 AA Standards compliant Angular components** and GraphQL APIs, resolving accessibility issues and improving system responsiveness.
- Reduced manual QA effort by **60%** using Selenium-based automated test suites.

Skills

Languages: JavaScript, TypeScript, Golang, Python, SQL, C++

Frameworks & Libraries: Angular, React, Node.js, Express, Flask, LangChain

Cloud & Infrastructure: AWS (API Gateway, Lambda, AppSync, S3, SQS, EventBridge, CloudFront, Bedrock), Docker, CI/CD (Jenkins)

Databases: PostgreSQL, DynamoDB, MongoDB, Redis

AI/ML: RAG Pipelines, LLM Integration, OpenAI API, Claude API, Prompt Engineering, Vector Search

Tools & Practices: Git, GraphQL, REST API Design, Microservices, Micro-Frontend Architecture, Selenium

Projects

EduBridgeX | React, NodeJS, MongoDB, Flask, Langchain, OpenAI, AWS S3

eduBridgeX 📄

- Architected the backend and AI modules for a rural education platform (team of 6) that won **Smart India Hackathon 2023** among 580 competing teams in the problem statement category.
- Developed an AI career counseling chatbot using **LangChain + OpenAI** with conversation memory and context retrieval, plus multilingual access and employment matching modules serving 3 regional languages.

Education

Birla Vishvakarma Mahavidyalaya, Anand, Gujarat

B.E. in Computer Engineering

2020 – 2024

CGPA - 9.11

Achievements

- Led and Secured **Winner position** in **Smart India Hackathon 2023** among 580 competing teams 📄
- Secured **Runner Up position** in **Smart India Hackathon 2022** 📄
- Solved **500+ problems** on **LeetCode** 📄
